

FULL-STACK DEVELOPER

ABOUT US

Fy is building the end-to-end platform for lifestyle brands. Think full-stack, upscale Etsy. We're rethinking the way designers sell their products online and how people shop for them.

To provide the best experience to our customers, we're solving hard problems using machine learning and relevancy prediction. If you're interested in learning and applying cutting-edge tech to build an industry-shaping consumer product, then you'll like it here.

We subscribe to Paul Graham's view that at a startup technology is your secret weapon. Currently, our arsenal includes Clojure, ClojureScript, Datomic, React Native and AWS. We're excited by new ideas and take time to consider how we can apply them to solve real-world problems more simply.

With the native iOS app and Fy platform (www.iamfy.co), we're now looking to expand our core team of engineers to further develop the platform and to scale the business.

You'll be working across a range of mobile, online and traditional marketing channels including - Facebook & Instagram marketing, Snapchat, digital PR, SEO and affiliate marketing.

ABOUT YOU

- You have helped build robust, scalable, production systems
- You have a strong background in either frontend, backend or mobile engineering, with an open mind to work on any problem domain.
- You have an in-depth understanding of at least one programming paradigm and have experience with others
- You're interested in functional programming and you're not scared of (parentheses)
- You enjoy communicating, questioning, problem-solving and taking ownership
- Experience with Clojure, Java, Javascript, React, ObjectiveC, graph databases or AWS are a bonus
- A background in data science or machine learning is a bonus

WHAT'S IT LIKE TO WORK HERE

The Fy team brings together a diverse and international mix of people from buying, creative and technology backgrounds. We're seasoned business-builders: ambitious and hard-working, but know how to have fun at the same time. We have team lunch, nights out and cocktail o'clock every Friday at our sunny offices in Berlin Kreuzberg.
